Fudan University Jiangwan Campus, No. 2005 Songhu Road, Yangpu District, Shanghai, China 200438

EDUCATION

Fudan University, Department of Environmental Science and Engineering Shanghai, China

M.S. in Resources and Environment (GPA 3.89/4.0, Rank 1/66) 09/2024 – 06/2027

Advisor: Prof. Zhaowu Yu

Courses: Environmental Economics, Atmospheric Environment Remote Sensing and Application, Frontiers of Environmental Engineering Technology, Watershed Pollution Control.

Awards: Nitori International Scholarship (2025)

Nanjing Forestry University, School of Landscape Architecture Jiangsu, China

B.S. in Landscape Architecture (summa cum laude, GPA 4.07/4.5, Rank 1/207) 09/2020 – 06/2024

Courses: Landscape Ecology, Physical Geography and Cartography, Meteorology and Climatology, Botany

Awards: Outstanding Graduate; National Scholarship (2021)

RESEARCH INTERESTS

Urban Environment, Global Climate Change, Spatial Analysis, Remote Sensing, Climate Impacts, Exposure and Risk, Adaptation Planning, Land Use Change, Environmental Equity.

RESEARCH EXPERIENCE

Fudan University, Graduate Researcher 09/2024 – present

- Developed the first global map of sunlight and shadow patterns across 1,487 major cities.
- Identified an asymmetric relationship between urban shadows and shortwave solar radiation.
- Contributed to econometric analysis of macroeconomic impacts of accelerated dry–wet extremes in China.
- Supported satellite remote sensing and field verification of the cooling effects of urban green spaces.
- Participated in applications for several laboratory grants related to climate and cities.
- The total citations of my publications have exceeded 400.

Nanjing Forestry University, Research Assistant

06/2020 – 06/2024

- Quantified residents' exposure to urban green spaces during China's rapid urbanization and identified key socio-spatial determinants.
- Used spatial econometric models to analyze, in space and time, how land-use patterns affect habitat quality.
- Developed a novel analytical framework combining top-down and bottom-up methods for assessing urban green-space accessibility.
- Obtained multiple national-level undergraduate research and innovation grants and successfully completed all funded projects.

RESEARCH PROJECT

Evaluating and optimizing urban green-space accessibility from a social equity perspective under the "Park City" initiative, Project Lead

05/2022 – 05/2024

Funding: China National University Student Innovation Program (No: 202210298047Z)

- Applied buffer analysis, spatial syntax, and least-two-step move search methods to analyze inequities in green exposure and propose optimization strategies.
- Led project proposal writing, experimental design, and manuscript preparation; the project received an "excellent" completion rating.

Research on the Conservation and Restoration of Bird Habitats in Urban Parks, Project Lead

05/2022 – 05/2024

Funding: China National University Student Innovation Program (No: 202210298048Z)

- Collected spatial data, assessed habitat quality with InVEST, and delineated ecological corridors using Linkage Mapper.

INTERNSHIP EXPERIENCE

Institute of Energy, Environment and Economics, Tsinghua University

Beijing, China

Research Intern (Supervisor: Prof. Shiyan Chang)

03/2025 – present

- Conducted research on future data center development in China under clean-energy deployment scenarios.
- Supported suitability mapping for carbon capture, utilization and storage (CCUS) across China.
- Explored the use of large language models to conduct meta-analyses of environmental texts.

Lancet Countdown Asia Center

Beijing, China

Research Intern (Supervisor: Prof. Wenjia Cai)

09/2024 – present

- Contributed to drafting the 2025 China report of the Lancet Countdown on Health and Climate Change.
- Collected information on policies, academic research, and activities related to climate change and health.
- Organized the collected information and produced a thematic reading report.

Division of Sustainable Energy and Environmental Engineering, Graduate School of Engineering, Osaka University

Osaka, Japan

Visiting Student (Supervisors: Dr. Jiaxin Zhang and Dr. Yunqin Li)

12/2021 – 03/2022

- Measured green-space accessibility using street-view imagery, spatial syntax, and points of interest (POI) data.
- Applied spatial metrics to analyze how landscape patterns influence habitat quality.

SKILLS & INTERESTS

- Software: ArcGIS, ENVI, GeoDa, Adobe Photoshop, Adobe Illustrator
- Programming: Python, R, Google Earth Engine, Deep Learning
- Model: Linkage Mapper, InVEST, Fragstats, and Conefor
- Interests: Tennis, archery, films
